Intermec LabelShop® version 6.11 Label Design Software

The latest version of Intermec's LabelShop label design software is now shipping. All orders currently in process will be upgraded to version 6.11. Label formats created in earlier versions of LabelShop will not be affected by this update. In fact, users of the current v.6.03 version can simply go to the Intermec website and upgrade 'free of charge' to the latest 6.11 version enabling them to enjoy all the new features available in LabelShop 6.11.

**LabelShop version 6.11 is an update of the current v.6.03 release.
New features include:**

- **Support for the EasyCoder PM4i**
- **Support for USB ports in LabelShop START**
- **Improved UCC/EAN 128 Wizard**
- **User Manager Update**
- **Function Week has been added to Formulas (ULTRA/PRO)**
- **Extended support for alignments (ULTRA)**
- **Windows XP is now supported without additional updates**
- **Datamatrix, QRCode and Postnet are now supported as printer resident bar codes on EasyCoder 501XP, 601XP, F2, F4, and PM4i**
- **Various driver improvements and corrections**

ColorCoder V4	Intermec 4000

* Drivers for Fingerprint and Direct Protocol mode included.

** Drivers for IPL, Fingerprint and Direct Protocol mode included

LabelShop ULTRA and PRO also supports any printer through Windows driver

Compatibility

LabelShop v.6.11 files cannot be opened with earlier versions, e.g. v.6.03 or earlier. Customers using versions 6.03 must upgrade to version 6.11 in all locations if files should be shared.

Upgrade from version 6.03

Customers using versions 6.03 can upgrade by downloading v.6.11 from the web. The current hardware keys are compatible with v.6.11.

Customers running older versions, e.g. v.4 or 5 must order upgrades, as usual.

Availability of version 6.11

LabelShop version 6.11 is now available for order. All orders for the older v.6.03 will be automatically changed to the new 6.11 version.
